GDM 321
Mikrofon mit Kugelcharakteristik, das heißt: Schall aus allen Richtungen wird gleich gut aufgenommen.

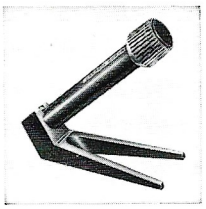

Omni-directional microphone. Sound waves from all directions are recorded equally well.

Microphone à caractéristiques sphérique, c'est à dire: un même son provenant de n'importe quelle direction est enregistré à un niveau égal.

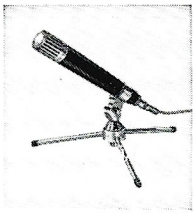

Microfono con caratteristiche omnidirezionali; il suono, da qualunque direzione provenga, viene registrato con la stessa intensità.

GDSM 331

GDM 318

GDM 322

Richtmikrofone mit Nierencharakteristik, das heißt: Schall, der von vorne auf das Mikrofon trifft, wird bevorzugt aufgenommen.

Directional microphones with cardioid characteristic. It is most sensitive to sound waves entering the microphone from the front.

Microphones directionnel a caractéristique réniforme, c'est à dire: le son parvenant à l'avant du microphone est enregistré de façon prédominante.

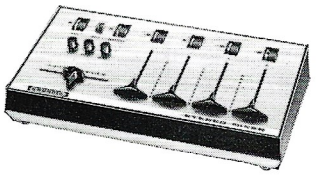

Microfoni direzionali a cardioide. Ciò significa che tutti suoni provenienti dalla parte anteriore del microfono sono registrati con maggiore intensità.
